Localization Latam

www.localis365.com

¿What is a localization?

Localis 365 is our localization solution for Dynamics 365, designed to meet the legal, accounting, and tax requirements across Latin America. It unifies language, regulations, and functionality into a single platform that adapts to each country.

¿How was it developed?

Entirely created by our innovation hub, Localis 365 was born with a regional vision: a robust, scalable solution built from the ground up to integrate multiple countries within a single instance. All under one codebase, without losing the native advantages of Dynamics 365.

¿Why choose Localis 365?

- Seamless integration with Dynamics 365: no interference, no performance loss.
- Optimized productivity: less training time, more focus on the business.
- Precise configuration: each workflow can be tailored to minimize operational errors.
- Shared and configurable functionality: designed to scale and solve efficiently.
- Regional compatibility: multiple countries, one single instance.
- Unified code for all of Latin America: simplifies maintenance and evolution.

SOLUTION SCOPE

Dynamics 365 Finance and Operations extends out-of- the-box country coverage in Latin America

By [Michail Filatov](#), Principal PM Manager

Microsoft selected our intellectual property and innovation team as a strategic partner for the development of Globalization for LATAM, its initiative to expand out-of-the-box regulatory and tax coverage across the region.

This collaboration validates our expertise and enables us to develop and incorporate new capabilities, extending the functional scope of the solution.

That's why Localis 365 integrates seamlessly with Microsoft Dynamics 365 Finance's out-of-the-box development, enhancing its native features.

It also includes LATAM countries and solutions not yet covered, ensuring broader and more consistent regional coverage.

Scalable Solutions Ready to Go.

**Discover our offering designed to
integrate seamlessly into any
Microsoft Dynamics 365 project.**

At Globalix 365, we specialize in developing functional solutions for the Microsoft Dynamics 365 ecosystem, focusing on solving the critical pain points that hinder implementations in Latin America: tax localization, electronic invoicing, banking automation, and more.

Localis 365

Tax, Accounting, and Fiscal Localization.
Enables legal operations in key Latin American
countries, fully compliant with local regulations.
[\[Learn more here\]](#)

Invoicing 365

Electronic invoicing across multiple Latin
American countries. Integrates with local tax
services, enabling the issuance, validation, and
tracking of invoices directly from the ERP.

Banking 365

Import, export, and reconciliation of banking
transactions in over 30 countries. Works with official
layouts and local banking standards, integrating into
the ERP's accounting logic without invasive
customizations or external connectors.
